Senior Water/Wastewater Engineer

This is an opportunity to join a well-respected and collaborative firm as a senior water/wastewater engineer. As a senior-level water/wastewater engineer at Kjeldsen, Sinnock & Neudeck, Inc. (KSN), you will have an opportunity support development of regionally important and exciting projects in the critical cycle of municipal water. KSN’s focus is on public-sector projects throughout the state, but with a focus on the Sacramento and San Joaquin valleys, foothills, and east bay area. The senior water/wastewater engineer is a key position in the tight-nit and growing water/wastewater utility group within KSN. The senior water/wastewater engineer works closely with the firm principals, other senior engineering staff and our growing water/wastewater focused team. KSN’s services are focused on assisting sanitary districts, water districts, cities and county departments, and irrigation districts in their replacement or rehabilitation of aging water supply and wastewater collection and treatment system systems. Services include planning, design, permitting, and construction management of new and/or rehabilitated facilities including pipelines, pump stations, storage facilities and treatment and recycled use projects. The Senior Water/Wastewater Engineer would work with the firm’s water utility group out of our West Sacramento office. This position has significant opportunity for advancement. Compensation and benefits are very competitive and exceed industry averages in profit sharing contributions and annual bonus.

Although this is a senior level position, as a small engineering and surveying firm, all team members provide hands-on technical support to the firm’s projects. In addition to being involved technically, this position includes providing leadership and management of the well qualified and highly experienced team. Additional responsibilities include:

- Assist with the oversight and management of the firm’s water/wastewater engineering services;
- Management of project teams on efficiently completing the scope of services for our clients;
- Assist with the preparation of proposals for engineering services;
- Perform client management duties and interaction, including but not limited to, attending meetings, taking calls, and exchanging emails for the successful delivery of services;
- Provide responsible charge duties, including signing and sealing documents related to the delivery of engineering services; and
- Mentoring and managing the development of staff who are interested in professional development within the water/wastewater profession.
Desired Skills and Experience

Key skills and professional requirements for this position include:

- Self-motivated, technically competent, client and solution focused individual.
- A good team member who will easily integrate into the firm’s collaborative culture.
- Able to be self-directing and self-starting, and clear and consistent in communication with team members and clients.
- Prefer 15 plus years of experience in the industry, but 7-10 years of experience with a strong trajectory towards a senior project management role and capabilities will be considered.
- California PE required.

Resume Submittal

Interested candidates should submit their resume, demonstrating meeting the minimum professional requirements listed above, along with a cover letter to:

Hiring Manager at hadmin@ksninc.com

About Kjeldsen, Sinnock & Neudeck, Inc.

KSN, with its predecessor firm, has been providing engineering and surveying services to primarily public sector clients in the Central Valley of California since 1956. KSN has offices in Stockton and West Sacramento with a total staff of nearly fifty engineers, surveyors, construction managers and technical and support staff. Because of our team’s skillset and our size, we can take on large multi-year projects and programs, but also deliver on complex small projects that often have urgent schedule needs. As a member of a small firm, everyone has the opportunity to have significant influence on the projects we undertake. Communication is encouraged and practiced with team members at all levels.

KSN offers a close-knit culture with an extremely low staff turnover. While the firm has grown over the past fifteen years, the growth has been deliberate and moderate to not risk losing its great culture. The firm embraces a strong spirit of integrity, professionalism, and innovation with project delivery and services. The firm’s goal is to be a trusted advisor to its clients in developing the right solutions; and through achieving that goal, a vast majority of the firm’s work continues to be with repeat clients.
